MITERA Pediatric Clinic offers health insurance to all newborns of MITERA and LETO Maternity Hospitals

In collaboration with "THE ETHNIKI" Insurance Company, HYGEIA Group announced that MITERA Pediatric Clinic offers a health insurance plan to the 17,500 children that are born on annual basis in MITERA and LETO, free of insurance premiums for the 1st year of their life.

This is an extension to the existing collaboration between HYGEIA Hospital and MITERA Pediatric Clinic with "THE ETHNIKI" Insurance Company, that ensures a very significant offer for children that are born in hospitals of HYGEIA Group.

"HYGEIA Group has always tried and managed to enter agreements with selected and reliable insurance companies", announced **Mr. Themistocles Charamis, Managing Director of HYGEIA Group**, during a Press Conference held on Wednesday, June 10th, 2009 at the "Nicholaos Louros" Conference centre of MITERA. "Under these strategic collaborations we have developed new products and services both with the insurance company of MIG Group, "Marfin Life", and now with "THE ETHNIKI" Insurance Company. Through these products we intend to embrace large populations providing them with true and beneficial services."

Mr. Doukas Palaiologos, Chairman & Managing Director of "THE ETHNIKI" Insurance Company also stated: "As a leading company in the insurance industry, "THE ETHNIKI" Insurance Company designed in collaboration with HYGEIA Group this health and hospital insurance plan for newborns. Our objective is clear, we want Greeks to get insured from the very first moment of their life; in this way, not only do they get insurance coverage but they also obtain insurance awareness which will be valuable for the rest of their life."

Mr. Alexios Komninos, Managing Director of MITERA, said about the services offered by the Pediatric Clinic: "MITERA Pediatric Clinic, which treats more than 4,000 children annually and handles more than 32,000 cases in its outpatient department, is now an integrated Pediatric Hospital. It has a Pediatric Cardiology and Cardiosurgical Clinic, unique to Greece in a Private Pediatric Hospital, a unique integrated Paediatric Ophthalmology Department and offers many other innovative services. With this plan we provide the 13,000 children born in our Maternity Hospital with free hospitalization in MITERA Pediatric Clinic. We consider it to be an important offer to the families which place their trust in our clinic."

As a representative of LETO, **Mr. Leonidas Papadopoulos, Gynaecologist-Obstetrician and Managing Director of LETO Maternity Clinic**, said: "We are very happy that as a member of HYGEIA Group we can offer such a significant "gift of life" to 4,500 newborns of our Maternity Hospital for their 1st year. From my point of view as a doctor, we all know that a child's first year is the most difficult period both for parents and the child itself".

The new "**Gift of Life**" **health insurance plan** provides children with insurance and hospitalization in MITERA Pediatric Clinic, with a 15% cost sharing for the insured and a maximum coverage limit of €173,000 per case.

The plan offers free insurance premiums for **the child's 1st year of life**. After the 1st year, the child's family has the option to extend the insurance coverage under preferential annual premiums.
